Release PV370 SV200 10

Changed 10

Release PV600 SV102

The theme of this release is defect resolution.

Deployment

- This release can be overinstalled on top of prior releases.
- Use OneStream Platform version 6.0.0 or later with this version of Parcel Service.
- Parcel Service requires an instance of Microsoft SQL Server 2012 or later.

New

None

Changed

None

Fixed

Customers can upgrade to the latest version of Parcel Service when using SQL Server 2012 or later. (MP3-1911)

Contacting Support

Contact OneStream Support by registering at <http://support.onestreamsoftware.com> and then emailing support@onestreamsoftware.com.

Release PV600 SV101

The theme of this release is defect resolution.

Deployment

- This release can be overinstalled on top of prior releases.
- Use OneStream Platform version 6.0.0 or later with this version of Parcel Service.

New

None

Changed

None

Fixed

Upgrade for setup tables completes successfully. (MP3-1801)

Release PV600 SV100

The themes of this release are performance improvements and UI enhancements.

Deployment

- This release can be installed on top of prior releases; however, it is recommended that you uninstall the user interface (**Settings > Uninstall > Uninstall UI**). This removes the prior user interface artifacts.
- Use OneStream Platform version 6.0.0 or later with this version of Parcel Service.

New

- When sending packages and package groups, packages and emails run in parallel. (MP3-256, MP3-55)
- When sending packages with multiple attachments, attachments run in parallel. (MP3-155)
- A new option, Concurrent Email Threads, is available in the Global Options settings and allows administrators to set the maximum number of email threads to run concurrently. The maximum number of email threads should be verified with the email administrator. (MP3-161)

Changed

- If the Name field is blank for packages, package groups, or distribution lists before upgrade, the blank values are replaced with “Unspecified” after upgrade. If there's more than one blank value, a number is added to Unspecified. (MP3-159)

When saving a package or package group, Parcel Service verifies that the name is unique for the package or package group. If the name is a duplicate or blank, a message is displayed. (MP3-153)

- When saving a distribution list, Parcel Service verifies that the name of the list is unique and not blank and that the list is not empty. If the name is a duplicate or blank or the list is empty, a message is displayed. (MP3-153)

Fixed

- File names that use spaces are saved with the spaces. (MP3-160)

Release PV440 SV200

The theme of this release is to introduce user improvements such as shipping multiple packages within package groups and a copy feature.

Release Date

October 15, 2019

Deployment

- This version requires you to uninstall the User Interface (**Settings > Uninstall > Uninstall UI**) of previous versions prior to installing. This removes the prior user interface artifacts in preparation of installing the new solution.
- The minimum OneStream platform version to use with this version of Task Manager is 4.4.0 or higher.

New Features and Enhancements

- Parcel Service can now send multiple packages at a time without clicking on each individual package by using Package Groups. (9810)
- Copy feature allows users to copy packages, package groups and distribution lists. To use the copy feature, the user must be assigned with a security role to access packages and/or distributions. (11441)
- When Test Mode is enabled, a new notification will appear stating the application is in test mode and the Parcel Service emails are not sent. (12368)
- New Security Role (Manage Parcel Service) to allow a user group to be considered a higher level administrator and can configure any aspect of the Parcel Service Solution.

Changed

- Variables can now be referenced within the email titles to utilize items such as Workflow, Scenario, and Time. (11257)

Fixed

- When a literal parameter uses a substitution variable such as [WFSubperiod], it no longer causes an error when shipping Packages. (10961)

Release PV440 SV100

The theme of this release is defect resolution with minor improvements (folder management).

Release Date

November 20, 2018

Deployment

- This version you to uninstall the User Interface (**Settings > Uninstall > Uninstall UI**) of previous version prior to installing. This will remove the prior user interface artifacts in preparation of loading the new solution. There are no database table changes.

New Features and Enhancements

- Parcel Service will now create folders if they don't exist when saving files. This can be controlled selecting the Create Fileshare Folder Path setting in Global Options. (8177)

Changed

- The XFDoc File Path was updated to list the full folder path. (6135)
- The solution was renamed to Parcel Service and the various interface styles and formatting were updated. (8910, 8911)

Fixed

- Substitution variables that were used in the solution parameters were returning null values. (5499)

Release PV410 SV101

The theme of this release is user enhancement requests.

Release Date

July 8, 2017

Deployment

- This release supports an overinstall for versions above PV370 SV400. There are no database table changes.

New Features and Enhancements

- XFBR/BRString scripts and parameters can now be used in Output File Name and Share Folder Path fields when defining package contents.

Changed

None.

Fixed

None.

Release PV410 SV100

The theme of this release is user enhancement requests.

Release Date

April 14, 2017

Deployment

- This release is an overinstall for versions above PV370 SV400. There are no database table changes.

New Features and Enhancements

- Substitution Variables can now be used in output file names.

Changed

- Updated all images and colors to new OneStream standard.

Fixed

- Resolved an issue where Substitution Variables were not processing correctly in report parameters.

Release PV370 SV200

The theme of this release is user enhancement requests.

Changed

- Initial Release Notes.
