Predictive Analytics 123 Release PV620 SV100

The themes of this release are bug fixes and performance enhancements.

Deployment

- This release supports an overinstall however, OneStream strongly recommends an *Uninstall UI* instead.
- Use OneStream Software platform version 6.2.0 or later with this version.

New

None.

Changed

- Check bound parameters are related to the correct Cube View navigation links. (MP-4091)

Fixed

- Prediction values are now written to the Import member of the Origin dimension. (MP-2699)
- Eliminated redundant cell calls when retrieving historical data cells. (MP-273)
- Eliminated storing predicted values of zero to the database. (MP-3949)
- Do not run predictive models against the Cube View parent rows. (MP-3982)
- Run prediction model only against rows with necessary historical values. (MP-3948, MP-271)
- Only clear default model at Cube View cell intersection. (MP-4143)

Known Issues

- The predictive model details present speedometer gauges which do not update appropriately between model selection. (MP-274)

Predictive Analytics 123 Release PV530 SV101

The theme of this release is defect resolution.

Release Date

May 14, 2020

Deployment

This release requires an *Uninstall UI* for prior versions. There are database table changes but no loss of data unless *Uninstall Full* is chosen.

New

None.

Changed

None.

Fixed

Template Setup not displaying proper Scenario values for Source and Target based on the selected Cube View.

The Python file path indicated on the setup page will be retained when performing an *Uninstall UI* but will be removed when performing an *Uninstall Full*.

Predictive Analytics 123 Release PV530 SV100

The theme of this release is the initial Predictive Analytics 123 (PAM) solution launch.

Release Date

December 27, 2019

Deployment

Initial release

New

None.

Changed

None.

Fixed

None.
