OneStream Standard System Reports (RPTS) Release Notes

Release PV430 SV102

This release includes the latest Standard System Reports that are now saved in a new format.

Release Date: 11/27/2018

Deployment

This solution supports overinstall. This release will not overlay the previous RPTS release.

New

- Added the new *Archived Task Activity* report. This report is designed to work with OneStream XF 5.X and higher releases. The report will not display information in XF 4.X environments because it relies on future functionality in XF 5.X. The other included Dashboards will function with PV430 installs. (9286)

Changed

- Software Version Audit Dashboard Parameter has been updated to add 120, 240 and 360 day audit periods to provide longer audit ranges. (6417)

- RPTS PV430 SV102 has been updated to the latest MarketPlace solution standards. Dashboard components have been renamed with the RPTS solution identifier and moved into a single Dashboard Maintenance Unit. This release will not overwrite the previous installed release of RTPS during the install. The older RPTS Dashboard maintenance units can be manually deleted from the System Dashboards if desired. (9314)

Known Issues

- None at this time.

Release PV430 SV101

This release includes the latest Standard System Reports that are now saved in a new format.

Release Date: 07/18/2018

Deployment

This solution supports overinstall. Note that any prior changes to the standard system reports will be overwritten. Check the *Instructions* document for details.

Changed

- This release of the Standard System Reports (RPTS) solution is a coordinated release with the Standard Audit Reports (SAR) solution PV430 SV100. The Security Group List Report, Security User by Group Report, User List Report and Users in Groups Report have been moved into the SAR solution with release PV430 SV100. The move allows the reports to take advantage of the enhanced business rule functionality found in the OneStream XF Application Tab that is not available when the reports are run from the OneStream XF System tab. (7420)

Release PV430 SV100

This release includes the latest Standard System Reports that are now saved in a new format.

Release Date: 02/12/2018

Deployment

This solution supports overinstall. Note that any prior changes to the standard system reports will be overwritten. Check the *Instructions* document for details.

Changed

- Updated the way these reports are stored in OneStream XF for stability and security purposes. Note that these reports will not operate in versions before 4.3.0. (5665)

Release PV410 SV101

Release Date: 01/18/2018
